## Alejandro QUINCOCES

«Recent work»

---

Exhibition from  
January 28<sup>th</sup> to March 1<sup>st</sup>, 2014

Preview on January 28<sup>th</sup>

For over 14 years the gallery ARCTURUS affirms its willingness to show **the work of contemporary European artists** with diverse artistic direction and **a predilection for contemporary Spanish painting.**

Since a few years, this trend continues with representing Alejandro Quincoques, painter born in 1951 in Bilbao. He will present to the gallery new artworks. **This is an atypical artist, fascinated from an early age by the music as much as painting.** He began his studies in Fine Arts at age 36 and quickly gained a real appreciation in Spain through numerous awards, and its presence in several collections and has also been exhibited regularly in Europe and the United States.

**Furthermore Alejandro Quincoques will have second exhibition in France at the “Tarbes’s Cultural Center” this year. Those two exhibitions will certainly introduce a major year for the artist.**

Items which he devoted himself are mainly views or urban landscapes: cities, factories, highways fixed on the canvas. By this way, he is removing a moment of everyday reality to the incessant flow of time. Through the superposition of intense layering, he seeks to describe the lively atmosphere of its environment, going as close to reality. **It is a mature and strong work, where the effects of matter and light create subtle vibrations, the artist plays on the tension between abstraction and referential paintings.**

This exhibition is the one of a contemporary painter whose **personality radiates a real inner strength** that gives him an air of serene simplicity and solidity, and whose work manages to fix a fleeting moment in an eternal one.

We welcome you with pleasure by appointment at a time of your choice to provide you with any information / additional material you might need.

"In his landscapes, one sees the amazing and painful awareness of the insignificance of man before the tragic grandeur of the scenario. A look at the outskirts of Bilbao through the eyes of a Turner or Friedrich, Quincoces celebrates Queen Nature, absolute mistress, in which man is invisible, but not absent."
