**In line with its predilection for Spanish contemporary painting developed since 20 years, Arcturus Gallery is pleased to present the fourth personal exhibition in Paris of the painter Alejandro QUINCOES.**

**This artist born in Bilbao in 1951, with an unusual path, had a passion from an early age as much for music as for painting. He began his studies of Fine Arts at the age of 36, and quickly gets a real recognition in Spain with many awards, and presence in many collections. He is also exhibited regularly in Europe and the United States.**

Subjects to which he devoted himself are mainly urban landscapes: cities, factories, highways, from a distance or up close, that he stares at and subtracts a moment of everyday reality to the incessant flow of time. Through the superposition of layers on wood, he seeks to capture the vibrant light of his environment. It is a mature and very strong work, where the effects of matter and light create subtle vibrations. The artist plays on the tension between abstraction and referential painting.

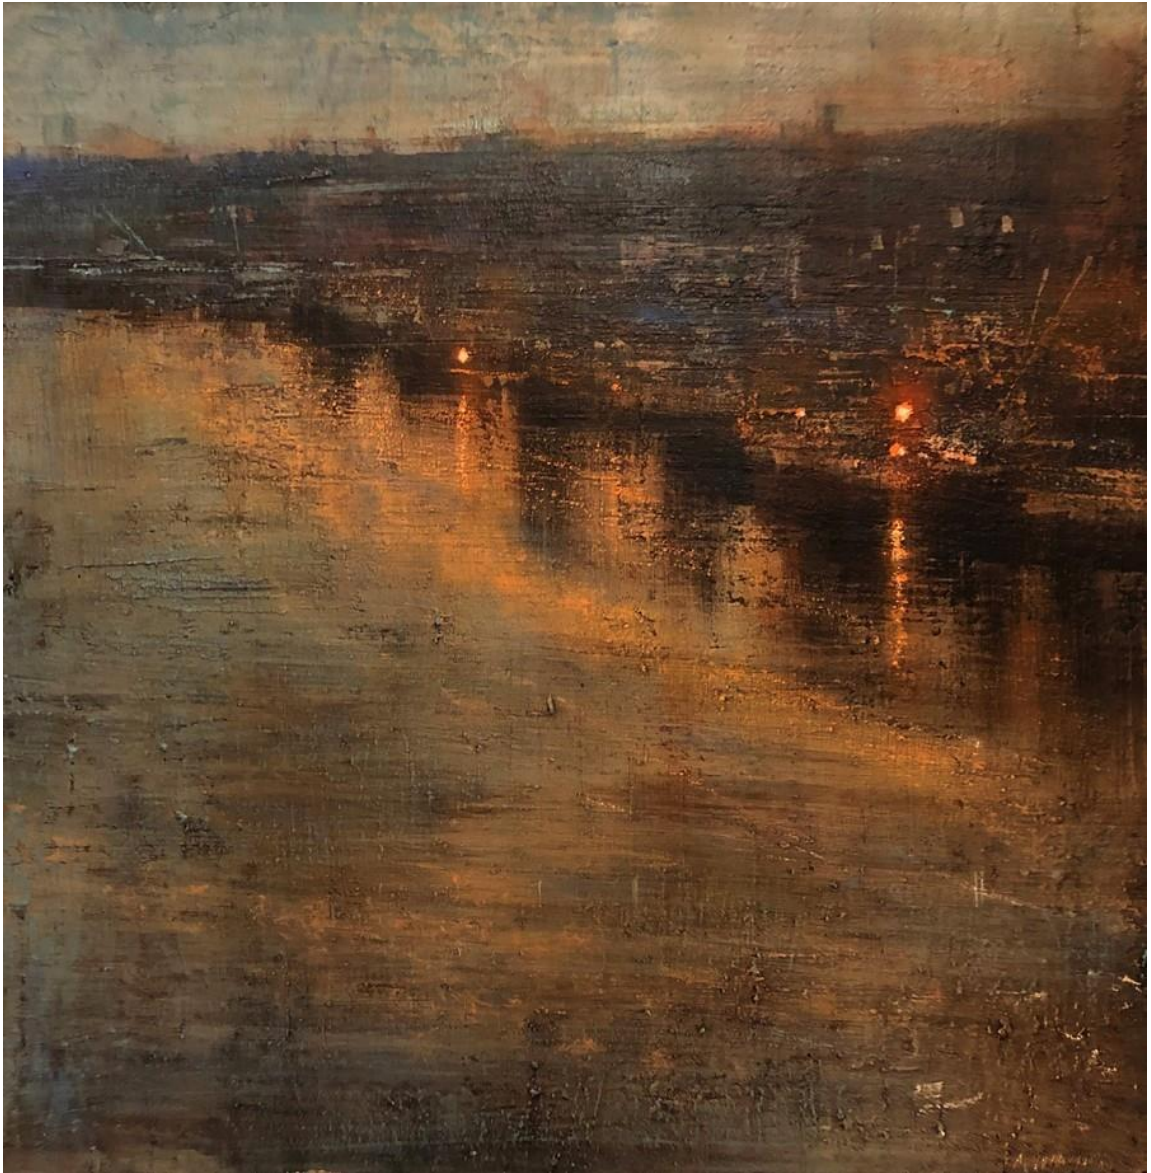

**This exhibition is the one of a contemporary painter whose personality liberates a real inner strength which gives him an air of simplicity and serene strength, and whose work manages to fix a fleeting moment in an eternal moment.**

We welcome you with pleasure by appointment at a time of your choice to provide you any information and additional matter you might need.
